

Flush Away

There are approximately five gallons of water used each time a toilet is flushed. How much water does your family flush away? Count each time the toilet is flushed to get a daily estimate for your home. Keep a record of daily flushes to get a weekly total. Write your daily flushes in the toilets below. Multiply by four to get your monthly total. Use these figures to make a bar graph.

Number of people in my family: _____

Sunday	Monday	Tuesday	Wednesday
			
Thursday	Friday	Saturday	
			

Total flushes x 5 gallons = Weekly use x 4 = Monthly use

My family's total: _____
