---

**REVISIONS**

1. Delete in its entirety: Bid Tab (No. 21-0029-UT); and,  
Replace with: Bid Tab (No. 21-0029-UT) Addendum 1

**QUESTION AND ANSWERS**

The following questions were received prior to the cutoff date. Answers follow each question.

1. Q: I am counting 5 manholes (San-2, San-5, San-8, San-10, San-11) that need to be rehabilitated. There are 4 shown on the Bid Form.  
A: Correct, there are 5 manholes requiring rehabilitation. Please see attached updated bid form.
2. Q: For the valve replacement portion of the project, do you want us to include the line stops in the valve replacement bid item or do you want to add additional bid items for line stops (like Bid Item 23)?  
A: RCW is an interruptible service we do not anticipate the use on any additional line stops for the project.
3. Q: For the restoration at each new service, can an allowance be put in the bid? It will be very hard to quantify how much restoration will be needed at each new service. With there being over 1000 services this can be a very large number depending on what needs to be replaced at each house (trees, pavers, irrigation, etc.).  
A: The cost for each service shall be completely inclusive for any restoration. Add additional costs to the bid items to cover the service line restoration.
4. Q: In what bid item do we put the Meter Reconnections shown on C15, C16 and C17?  
A: Meter reconnections on Sheets C15, C16, and C17 are included in Bid Item 4, 2-inch RCW Polyethylene installed via HDD.
5. Q: For Example, Site A is on "Y Street" between "Avenue 1 & Avenue 10", Clearwater, FL + Zip Code if you have it ... If you could send me each of the Site Addresses in that format, (as there is usually no Street Address associated with Pipe Work), that would be great! ...  
A: The cover page provides a summary of the four sites which can be referenced to identify the specific streets and cross streets for the proposed work. Additional detail is included in each sheet title block.
