

Addendum #1
20-0026-EN, 2021 Sidewalks
October 28, 2020

TO: Prospective bidders and other interested parties

NOTICE IS HEREBY GIVEN that the following addendum serves to provide clarification of measurement of contract quantities on ITB 2021 Sidewalks #20-0026-EN.

37. MEASUREMENT OF CONTRACT QUANTITIES – The Contractor shall provide the Project Inspector a list of construction quantities (including square yards, *square feet*, *linear feet*, and tons of material used) for each street on a weekly basis and preceding each payment. This information is needed to charge specific budget codes within the City's Capital Improvement Program.

Clarification: Mr. Erik Soderlund, City's Senior Construction Inspector noticed in Section IV-A, 37., that the construction quantities for concrete should include units for sidewalk in square feet and for curbing in linear feet. This is reflected in the bid tabs.
