- i.11 **RESPONSIBILITY TO READ AND UNDERSTAND.** Failure to read, examine and understand the solicitation will not excuse any failure to comply with the requirements of the solicitation or any resulting contract, nor shall such failure be a basis for claiming additional compensation. If a vendor suspects an error, omission or discrepancy in this solicitation, the vendor must immediately and in any case not later than seven (7) business days in advance of the due date notify the contact on page one (1). INSTRUCTIONS – EVALUATION

- i.22 **EVALUATION PROCESS.** Bids will be reviewed by the Procurement Division and representative(s) of the respective department(s). The City staff may or may not initiate discussions with bidders for clarification purposes. Clarification is not an opportunity to change the bid. Bidders shall not initiate discussions with any City employee or official.
- Respondent is hereby notified that Section 287.05701, Florida Statutes, requires that the City may not request documentation of or consider a vendor's social, political, or ideological interests when determining if the vendor is a responsible vendor.
- i.23 **PRESENTATIONS/INTERVIEWS.** The bidder must provide a formal presentation/interview upon request.
- i.24 **CRITERIA FOR EVALUATION AND AWARD.** The City evaluates three (3) categories of information: responsiveness, responsibility, and price. All bids must meet the following responsiveness and responsibility criteria to be considered further.
- a) Responsiveness. The City will determine whether the bid complies with the instructions for submitting bids including completeness of bid which encompasses the inclusion of all required attachments and submissions. The City must reject any bids that are submitted late. Failure to meet other requirements may result in rejection.
 - b) Responsibility. The City will determine whether the bidder is one with whom it can or should do business. Factors that the City may evaluate to determine "responsibility" include, but are not limited to: excessively high or low priced bids, past performance, references (including those found outside the bid), compliance with applicable laws-including tax laws, bidder's record of performance and integrity - e.g. has the bidder been delinquent or unfaithful to any contract with the City, whether the bidder is qualified legally to contract with the City, financial stability and the perceived ability to perform completely as specified. A bidder must at all times have financial resources sufficient, in the opinion of the City, to ensure performance of the contract and must provide proof upon request. City staff may also use Dun & Bradstreet and/or any generally available industry information. The City reserves the right to inspect and review bidder's facilities, equipment and personnel and those of any identified subcontractors. The City will determine whether any failure to supply information, or the quality of the information, will result in rejection.
 - c) Price. We will then evaluate the bids that have met the requirements above.
- i.25 **COST JUSTIFICATION.** In the event only one response is received, the City may require that the bidder submit a cost proposal in sufficient detail for the City to perform a cost/price analysis to determine if the bid price is fair and reasonable.
- i.26 **CONTRACT NEGOTIATIONS AND ACCEPTANCE.** Bidder must be prepared for the City to accept the bid as submitted. If bidder fails to sign all documents necessary to successfully execute the final contract within a reasonable time as specified, or negotiations do not result in an acceptable agreement, the City may reject bid or revoke the award, and may begin negotiations with another bidder. Final contract terms must be approved or signed by the appropriately authorized City official(s). No binding contract will exist between the bidder and the City until the City executes a written contract or purchase order.
- i.27 **NOTICE OF INTENT TO AWARD.** Notices of the City's intent to award a Contract are posted to Purchasing's website. **It is the bidder's responsibility to check the City of Clearwater's website at <https://www.myclearwater.com/business/rfp> to view relevant bid information and notices.**

S.14 **AUDITS AND RECORDS.** Contractor must preserve the records related to this Agreement for five (5) years after completion of the Agreement. The City or its authorized agent reserves the right to inspect any records related to the performance of work specified herein. In addition, the City may inspect any and all payroll, billing or other relevant records kept by Contractor in relation to the Agreement. S.16 **SECURITY CLEARANCE AND REMOVAL OF CONTRACTOR PERSONNEL.** The City will have final authority, based on security reasons: (i) to determine when security clearance of Contractor personnel is required; (ii) to determine the nature of the security clearance, up to and including fingerprinting Contractor personnel; and (iii) to determine whether or not any individual or entity may provide services under this Agreement. STANDARD TERMS AND CONDITIONS

assurance of its intent and ability to perform. In the event that the demand is made and no written assurance is given within five (5) calendar days, the City may treat this failure as an anticipatory repudiation of the Agreement.

- S.18 **REMEDIES.** The remedies set forth in this Agreement are not exclusive. Election of one remedy will not preclude the use of other remedies. In the event of default:
- a. The non-defaulting party may terminate the Agreement, and the termination will be effective immediately or at such other date as specified by the terminating party.
 - b. The City may purchase the services required under the Agreement from the open market, complete required work itself, or have it completed at the expense of Contractor. If the cost of obtaining substitute services exceeds the contract price, the City may recover the excess cost by: (i) requiring immediate reimbursement to the City; (ii) deduction from an unpaid balance due to Contractor; (iii) collection against the proposal and/or performance security, if any; (iv) collection against liquidated damages (if applicable); or (v) a combination of the aforementioned remedies or other remedies as provided by law. Costs includes any and all, fees, and expenses incurred in obtaining substitute services and expended in obtaining reimbursement, including, but not limited to, administrative expenses, attorneys' fees, and costs.
 - c. The non-defaulting party will have all other rights granted under this Agreement and all rights at law or in equity that may be available to it.
 - d. Neither party will be liable for incidental, special, or consequential damages.
- S.19 **CONTINUATION DURING DISPUTES.** Contractor agrees that during any dispute between the parties, Contractor will continue to perform its obligations until the dispute is settled, instructed to cease performance by the City, enjoined or prohibited by judicial action, or otherwise required or obligated to cease performance by other provisions in this Agreement.

DETAILED SPECIFICATIONS

4. **SCOPE OF WORK.** The City seeks a qualified Contractor(s) for a citywide, nondestructive and noninvasive (i.e. not require destructive connections to the main such as a tap), acoustic leak detection services program for the City's potable water and RCW transmission and distribution systems. Work shall include but not be limited to:
- A. Conduct acoustic leak detection on potable and RCW transmission and distribution systems utilizing appropriate methodology to ensure complete coverage and evaluation of the system. The subsequent sections further detail the minimum requirements for completing the acoustic leak detection.
 - B. Submit a work plan to the City Project Manager for review and approval before commencing the survey. Work plan shall outline the specific methods to be used.
 - C. Survey various pipes at appropriate intervals to identify leaks and pinpoint the specific location of the leaks.
 - i. The pipes specified in Table 1 – Summary of Requested Leak Detection, shall be surveyed initially in the first year (~730 miles), followed by surveying for leaks at a minimum rate of 185 miles of pipe per year (~25% per year). Piping to be surveyed by the Contractor may be grouped into areas as directed by the City such as per grid area.
 - D. In general, the intervals set forth below are suggested. It is understood that pipe appurtenances (valves, hydrant auxiliary valves, hydrants, service valves or meter sets) may be utilized at listening points. In such cases, the order of preference is as follows: direct contact with the pipe, main line valves, hydrant valves, hydrants, then service valves or meter sets.
 - i. Metallic type pipes: listening distances shall not exceed 500' between points.
 - ii. AC/Concrete type pipe; listening distances shall not exceed 300' between points.
 - iii. PVC and HDPE type pipe; listening distances shall not exceed 150' between points.
 - E. In addition to surveying the defined pipe lengths above, the Contractor shall provide both "on-call" and emergency leak detection services.
 - i. Non-emergency/On-call leak detection services shall be defined as notification from the City which requires the Contractor to mobilize within two (2) days to investigate and locate a leak at the request of the City. Mobilization will be approved annual, one (1) mobilization for the first survey of 100% of the system and one (1) each for each of the annual 25% surveys.
 - ii. Emergency leak detection services shall be defined as notification from the City which requires the Contractor to mobilize within three (3) hours to assist in the event of a leak which directly effects the consumers' access to the services. Contractor(s) may be required to perform emergency services at times other than normal business hours.
 - F. Leak Detection shall be completed during normal business hours (8 AM to 5 PM) when possible. It may be necessary to conduct parts of the Leak Survey during "off hours" such as at night. This may be required in areas of high traffic volume (where traffic noise may affect the Contractor's ability to detect leak noise) or where traffic volume may affect the ability of the Contractor to safely access main line valves (such as valves located in a travel lane). The Contractor shall provide 48-hour advanced notice of intent to survey a particular area that may require a deviation from normal business hours.
 - G. Compile the leak detection information into a complete and comprehensive report per the requirements detailed in the Documentation section.
5. **EQUIPMENT.** The Contractor shall utilize advanced leak detection sound amplification (acoustic) instruments to conduct the system survey. All equipment shall be specifically designed for the

DETAILED SPECIFICATIONS

purpose of locating leaks while the system remains online. Equipment shall include, at a minimum, sensitive leak correlators for locating and ground microphones for confirming leaks. Equipment shall be non-invasive and non-destructive (i.e., not requiring destructive connectoins to the main such as a tap), and shall meet the following specifications:

A. Leak Correlators:

- i. Shall not be dependent on technician listening.
- ii. Shall be utilized for highly sensitive locating of leaks.
- iii. Shall be capable of detecting leaks on plastic and metal mains, including mains in high traffic urban areas, with a high level of accuracy.
- iv. Shall be capable of being connected wirelessly to computer equipment for real-time viewing or collecting & storing data for extended periods of time.
- v. The leak detection equipment to be used shall be Echologics LeakFinder-ST, Echoshore M, Sensus Permalog+, Gutermann ZoneScan 820, or City approved equivalent.

B. Ground Microphones

- i. The Contractor shall utilize electronic listening equipment (ground microphones) specifically designed for leak detection to pinpoint the location of leaks identified by acoustic leak sensors and correlators described above.
- ii. Electronic listening equipment shall be equipped with an acoustic microphone and listening stick (or equivalent technology) to allow for direct listening on pipes, fittings, and other piping appurtenances, as well as on the ground surface.
- iii. The electronic listening equipment to be used shall be an FCS S30, Gutermann AquaScope 3, or City approved equal prior to the commencement of work.

C. The Contractor shall utilize electronic Global Positioning System (GPS) equipment to log the locations of located leaks. The GPS shall be Arrow Gold GNSS or City approved equal.

D. The Contractor shall provide a list of equipment proposed for use with bid submittal for review by the City. After award, the Contractor shall provide a leak detection plan further defined in these specifications.

6. EXECUTION OF LEAK DETECTION.

A. The Contractor shall be responsible for furnishing all materials or equipment necessary to complete the services described herein, including items (equipment, services, expendables, etc.) not specifically identified but necessary for the successful completion of identifying and locating leaks.

B. The Contractor shall make all efforts to limit the effects of leak detection on the surrounding public including but not limited to selecting equipment that may be placed and collected at a later time to avoid significant effects to traffic or property owners.

C. Contractor shall directly contact all fire hydrants, all main line valves, and when necessary, selected service connections in the entire distribution system at intervals appropriate for a complete leak detection survey.

D. A "Leak log" shall be maintained at all times during the term of this contract, indicating all areas where suspected leak noise was heard and shall include a description of area, types of problems observed, locations of leaks discovered, including a sketch and three-point ties to existing, permanent surface features, and any discrepancies in material, size, and other properties between the field observations and documentation provided by the City.

E. When suspected leak noise has been detected, the Contractor shall verify the suspected area a second time to confirm. The second, confirmatory test shall be conducted no sooner than four (4) hours from the initial test.

DETAILED SPECIFICATIONS

- F. When normal contact points are not available and ground cover is comprised of a hard surface (i.e. asphalt or concrete surface), Contractor shall use ground microphones, making physical contact at intervals no greater than six (6) feet directly over the pipe (i.e. asphalt or concrete surface).
- G. When contact points are not available and ground cover is not comprised of a hard surface, probe rods shall be placed at six (6) foot maximum intervals along the subject pipe route. Probe rods with sound amplification shall be driven into the ground a minimum of six (6) inches directly over the pipe when ground conditions permit.
- H. The Contractor shall locate the main and service lines in the immediate area so the correct pipe distances can be entered into the leak correlator.
- I. The leak location shall be marked in the field (on the surface) using environmentally formulated precautionary blue paint or other color specified by the City.
- J. The Contractor shall record GPS coordinates for all leak locations found. GPS accuracy shall be sub-meter accuracy.
- K. Leaks shall be classified as follows:
 - i. Class 1: Any leak which is hazardous with respect to potentially undermining, possibly resulting in surface collapse, damage to nearby utilities, commercial or private properties, or leaks severe enough to warrant immediate repair.

 - iii. Class 3: Small leaks which should be repaired as workload permits.
 - o If the Contractor(s) finds a leak and believes the leak is serious and critical in nature (Class 1), the Contractor(s) shall immediately notify and verbally speak with the City Project Manager. Other identified leaks (Class 2 and Class 3) shall be reported to the Project Manager at the end of each day.
- L. The Contractor shall document all leak locations with a diagram (including 3-point ties to existing, permanent surface features) indicating the location of the leak. Other information related to the correlation (filters used for the correlation, line locations, distances between sensors, etc.) shall be included on the field sheet.

7. **PROJECT PLAN APPROACH:**

The Contractor shall complete and submit a "Project Approach" summary, demonstrating their complete understanding of acoustic leak detection methodologies to be employed, to the City within 30 days of award. This summary shall be a narrative describing the Contractor's planned leak detection equipment, methodology, and approach to the project. A comprehensive project management plan and planned auditing techniques shall be outlined. Contractor shall account for potential problems to be expected and techniques to be employed for solving those problems as in situations where limited record data is available such as unknown pipe material, and accessibility to water system appurtenances. Quality Control and Quality Assurance procedures shall be outlined in this section, thus ensuring the accuracy of the analysis of the data.

The Contractor shall outline their proposed Project Management system relating to the objectives of the City's project. The Project Manager's responsibilities shall be clearly spelled out as well as the responsibilities of the two (2) person field team consisting of a Field Project Leader and a Field Technician, with task assignments clearly spelled out. This will identify who has the authority to speak on behalf of the Contractor for progress reports and any changes to the project that may affect the outcome and completion of the project.
